

NEW WOODSTOCK WATER DISTRICT USER
NEW WOODSTOCK, NY

Dear New Woodstock Water District User,

The Town of Cazenovia will begin installation of water meters to all residents in the New Woodstock Water District.

In order for this process to occur, Town of Cazenovia Water Plant Operator, Chris Sgouris, will need access to the location your water service enters your home on two occasions. The first time will be to evaluate what supplies are necessary to install the new water meter. This process should take no more than ten (10) minutes to complete. The second time will be for the actual installation of the water meter. The installation process should take approximately thirty (30) minutes or less. The installer will communicate with you if he anticipates additional time will be required.

As a district user, there is no cost to you for the water meters. However, the water meters are not optional.

Please contact Chris Sgouris to schedule your appointment (315) 715-5985 or by email at chrissgouristoc@gmail.com. Any questions can be directed to Mr. Sgouris.
